

JET Oxide¹⁵

Directions for use: Irrigation line cleaner

Jet-Oxide[®] 15% removes blockages in irrigation systems and unplugs blocked emitters. **Jet-Oxide 15%** is injected into the irrigation system to remove deposits that reduce the flow of water.

Jet-Oxide 15% is injected at a curative rate of 15 fl. oz. per 1,000 gallons of water. Run the irrigation set for a minimum of 30 minutes. Thereafter, the irrigation cycle should be discontinued and the line should not be flushed. Contact time is the key to successfully using this product. Allow for a min contact time of 4-8 hours . If possible leave Jet-Oxide in the lines over night. Two to three treatments may be necessary to remove all blockages.

Jet-Oxide 15% can be used as a monthly maintenance program. Use 7.5 fl. oz. per 1,000 gallons of water. Run the irrigation set for a minimum of 30 minutes. Thereafter, the irrigation cycle should be discontinued and the line should not be flushed. Contact time is the key to successfully using this product. Allow for a min contact time of 4-8 hours . If possible leave Jet-Oxide in the lines over night.

<p>Curative Rate: 15 fl. oz. per 1,000 gallons of water</p>
<p>Allow contact time of 4-8 hours (or overnight).</p>
<p>No flushing or intensive labor required. Repeat 2-3 times for stubborn blockages</p>
<p>Monthly Maintenance Rate: 7.5 fl. oz. per 1,000 gallons of water</p>
<p>Allow contact time of 4-8 hours (or overnight).</p>
<p>RE-ENTRY: Immediate. Contact with product at dilution is not harmful to humans or animals.</p>

Mix Jet-Oxide with:
