

**ORGANIC CORN**

**ORGANIC PEST MANAGEMENT PROGRAM  
FIELD, SWEET, POPCORN**

Majestene® Bionematicide/Bioinsecticide provides protection from multiple below ground pests that reduce grain yield.

**PROTECT CORN FROM:**

- Wireworms
- Nematodes
- White Grubs
- Seed Corn Maggot
- Corn Rootworm Larvae

Majestene is a liquid bionematicide/bioinsecticide containing non-viable Burkholderia spp. strain A396 cells and spent fermentation media. Compounds produced during the fermentation process are active against multiple soil-borne insects and plant-parasitic nematodes.

**KEY BENEFITS:**

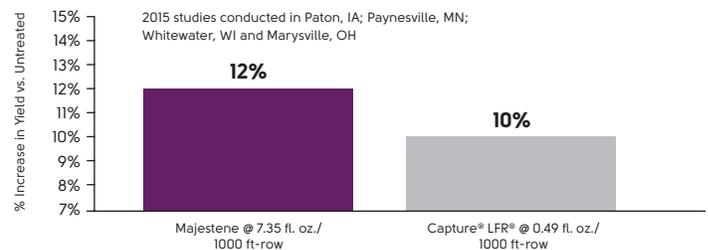

- Effective against eggs, juveniles & adults
- Active in roots for at least 7 days
- Promotes root development
- MRL Exempt: ideal for export market

**IN-FURROW APPLICATION:**

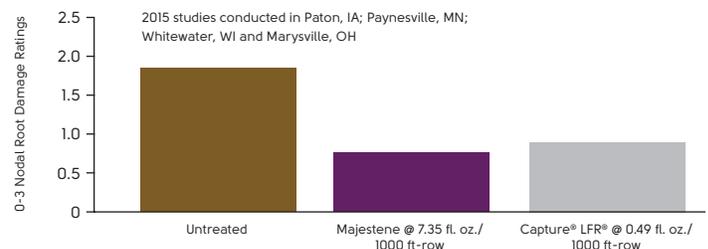

Apply Majestene in-furrow or as a T-band application over an open furrow during planting at 1 gallon per acre or 7.35 fl. oz./1000 feet-row in 30 inch row spacing. Refer to the product label for application rates for other row spacings.

**Yield Increase**

**Corn Rootworm Protection**

**Control of Seed Corn Maggot**
